Managing API Keys

By **Molly Tyler**
Content Team Lead

REVIEWED By **Claire Broadley**
Content Manager

Want to connect to our secure SendLayer API?

Using your unique API key, you can connect your website or app to our platform.

In this tutorial, we'll show you how to locate your SendLayer API key.

Table of Contents

[Viewing API Keys](#)

[Showing Your API Key](#)

[Creating an API Key](#)

[Deleting an API Key](#)

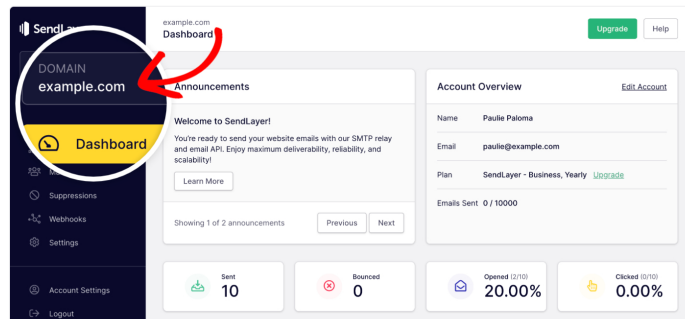

Need Help?

Before getting started, be sure to:

✓ [Authorize your domain](#)

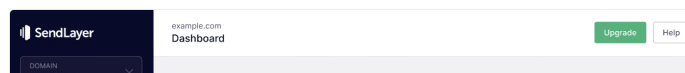

Viewing API Keys

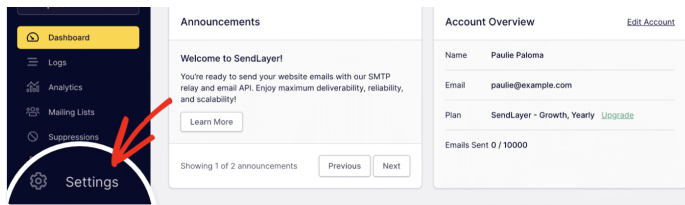

To see the API keys currently available to you, [log in to your SendLayer dashboard](#) and check that the right domain is selected in the dropdown in the top left corner of the page.

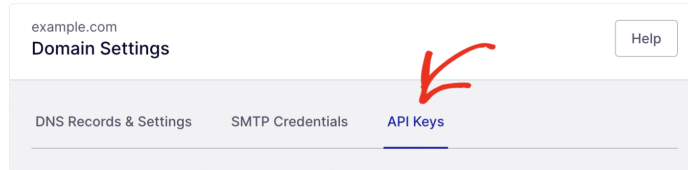

Need Help?

Then click on **Settings** in the menu on the left.

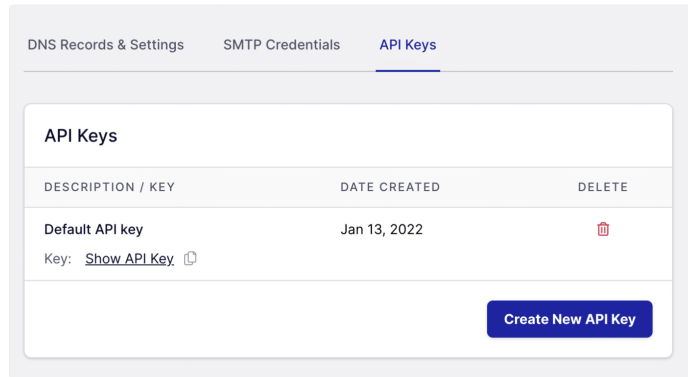

On the next screen, click on the **API Keys** tab.

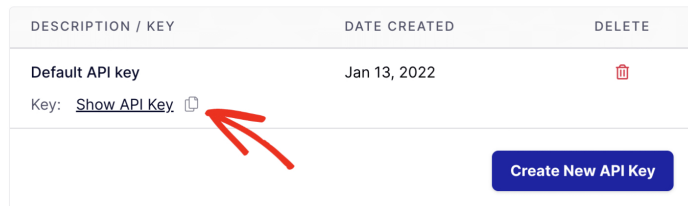

SendLayer automatically creates an API key for you when you authorize your domain. Here you'll see a list of all the API keys currently associated with your domain.

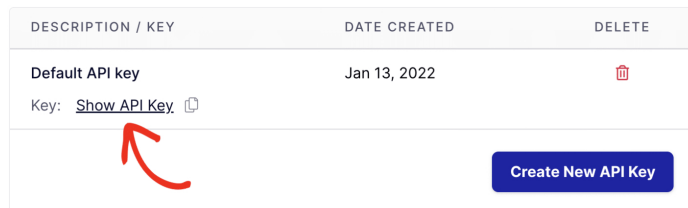

Showing Your API Key

For security reasons, your API key is hidden in your SendLayer dashboard. You can copy your key without revealing it by clicking on the **copy** icon to the right of it.

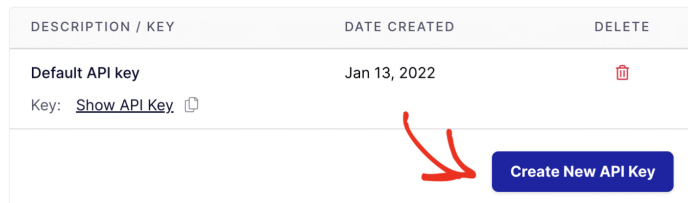

However, if you want to view your API key, you can click on **Show API Key** to see it.

Creating an API Key

If you need to generate a new API key, just click on the **Create New API Key** button.

This will open a popup where you can enter a descriptive label for this API key.

Create New API Key

Give a description to your API key so it's easy to remember where this API key is used. A short description would be enough.

API Key Description *

[Cancel](#) [Create](#)

Then click the **Create** button. Your new key will be generated right away.

✓ New API key is created.

API Keys

DESCRIPTION / KEY	DATE CREATED	DELETE
Default API key Key: Show API Key	Jan 13, 2022	
Test key Key: Show API Key	Mar 08, 2022	

[Create New API Key](#)

Deleting an API Key

To delete an API key from your SendLayer account, just click on the **trash** icon in the table.

DESCRIPTION / KEY	DATE CREATED	DELETE
Default API key Key: Show API Key	Jan 13, 2022	

[Create New API Key](#)

You'll then see a popup asking if you're sure you want to delete your API key. Click on **OK** to proceed.

Delete API Key

Are you sure you want to delete this API key?

[Cancel](#) [OK](#)

Note: If you delete an API key, any sites or apps using it to connect to your SendLayer account will be disconnected. You'll need to reconnect them by following the steps in our guide to [setting up your SendLayer API connection](#).

That's it! Now you know how to view and manage API keys in SendLayer.

Next, would you like to learn about how to create new SMTP credentials? Check out our tutorial on [managing your SMTP credentials](#) for more information.

Solve Your Email Delivery Problems

Reliably send your emails with the most powerful SMTP and email delivery platform.
